14 September 2015

Dear Sir or Madam:

It is my pleasure to recommend Mr Daniel Dobiński for studies within the Erasmus Mundus Master Course in Sustainable Transportation and Electrical Power Systems.

Mr Dobiński has been preparing his BSc thesis under my supervision, showing an interest in electronic power conversion circuits and renewable energy. He has demonstrated a strong motivation for work and the ability to acquire new knowledge and practical skills. He was determined to solve design problems on his own, but he also knew when to ask for guidance. Overall, he has appeared to me as a skilled, hard-working and honest person.

Please feel free to contact me should you need any additional information.

Yours sincerely,

Lukasz Starzak
